- * Increase sales revenue
- * Focus on the sale, as we fulfil the recharge
- * Bundle airtime or data bundles with hardware sales – 3G modems, prepaid phones and laptops

At last, an easy way to vend

With more and more people opting for pre-paid flexibility, Serveport is the simplest way to vend Vodacom pre-paid airtime, 3G data or SMS bundles. You execute the sale, and we take care of recharging the user.

Don't want to manage vouchers or PIN's? No problem.

We load recharges automatically onto the user's SIM. They receive an SMS as the recharge is done. It's that simple. No vouchers, No PIN's, No hassle.

Simple and secure

Using https protocol secured via TLS, the recharge interface is simple SOAP-free interface running on HTTPS. Easy to integrate, secure, and scalable.

No commitment

SIMaudit has no monthly subscription and no long-term contracts. SIM lookups can be done as and when needed.

Online purse gives you total control

The pre-funded purse keeps your service active. You receive your margin on airtime at the time of sale. No stock, no risk.

Bundle special offers with hardware

Create special offers by bundling data or airtime with your hardware sales such as 3G modems, prepaid phones or laptops. We can also supply ready-to-go prepaid SIM cards to ship with hardware.

How to get going

Option 1: Pick up the phone and call +27 (0) 11 507 4755

Option 2: E-mail us at info@flickswitch.co.za. We'll even call back if you want.

Option 3: Tweet us [@flickswitchSIM](https://twitter.com/flickswitchSIM)

Should you be increasing revenue by offering automated airtime and data bundles on your online retail site?

Yes. You probably should.
